COLMAN
Air Distribution

Engineered Air Products

- Grilles
- Diffusers
- Louvres
- REPUS® – Displacement Ventilation
- Bespoke Service

The foundations of the present day Colman Air Distribution were built in 1965 when Barber-Colman started operating in Manchester, UK.

They have expanded operations and services throughout the intervening years to become a company synonymous with quality in the Air Distribution sector.

Their constantly evolving range includes:

Grilles: Return Air; Security; Supply; Transfer; Linear Bar; Heavy-Duty; Hinged-Core

Diffusers: Linear-Slot; Swirl; Perforated; Louvre; Floor; Jet; Circular; Nozzle; Drum-Louvre

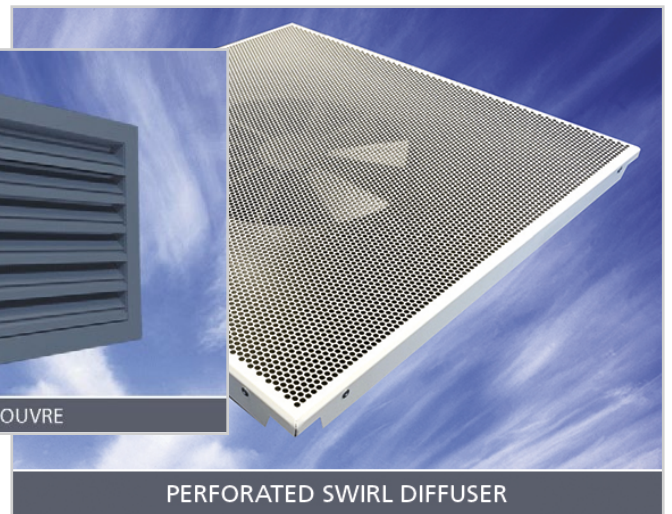

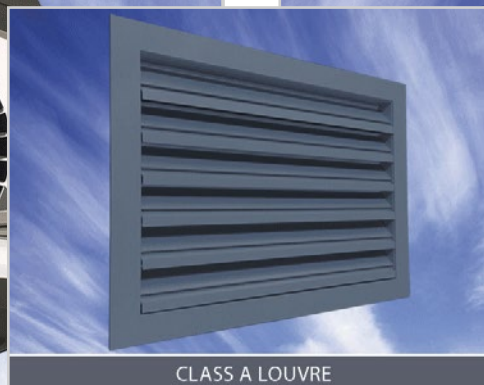

Louvres: External; Glazed-In

Bespoke Service

Colman offers a bespoke service which includes the supply of products in special colours to meet Architectural design specifications.

Our products can be made out of stainless steel or be designed with various different finishes including bronze, brass, gold and chrome for luxury homes, hotels, restaurants, palaces, etc.

We can design solutions where standard products do not fit the requirements of the build.

Colman grilles, diffusers and louvres have been installed on numerous projects including The Royal Albert Dock Development (far left) and The Alliance Manchester Business School with new projects for 2019 including Mercedes Benz in Stockport and the Aloft Hotel in Aberdeen.

If you would like information on our projects and the products used in them, please contact us.
