

Delivering Optimised Indoor Air Quality

Air flow (m³/s x 1,000)

Daikin Applied (UK) Ltd designs and manufactures a range of Air Handling Units from standard modular units to more complex bespoke systems, which are design to provide inherent flexibility that can be configured and combined specifically to meet the exact requirements of any healthcare building. Our AHU's are designed to be the most environmentally friendly and energy efficient on the market, thus reducing their ecological impact, whilst keeping costs down through the minimisation of energy consumption. Combined with the small physical footprint of the system, these features make our Air Handling Units ideal for your application.

D-AHU Professional

0.21 m³/s
up to 40 m³/s
