

Evinox ModuSat® XR

Choose the 'Smart' HIU with Hidden Extras

Designed for modern, energy efficient heat networks, and tested to the UK Standard from BESA, the ModuSat® XR HIU delivers high performance at low primary flow temperatures, in-line with new GLA planning guidance.

Units come as standard with full remote connectivity, which allows for diagnostics, commissioning, aftercare support and meter data to be accessed over the internet.

Features

- ✓ Extra compact and ideal for tight installation constraints
- ✓ Electronic Control
- ✓ Optional Energy Display Device
- ✓ Fast and responsive DHW performance

Designed for Efficiency

- ✓ Programmable Keep-Warm function
- ✓ High performance at low primary flow temps as per GLA planning requirements
- ✓ Low DHW return temperature, as per CIBSE CP1

Metering & Billing

- ✓ Inbuilt MID approved heat meter
- ✓ Integrated Pre-payment technology – Ready to go!
- ✓ Open protocol data access

Remote Connectivity

- ✓ Remote configuration and commissioning
- ✓ SmartTalk® Pro web portal for aftercare during defects liability period

Selecting the best ModuSat® XR HIU for your next project couldn't be easier, use our online sizing & network calculations tool today!
