

DENCO® Products

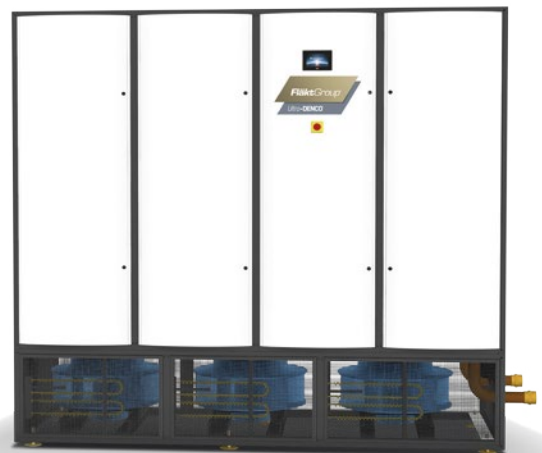

Multi-DENCO®
Inverter Free Cooling
Close control unit

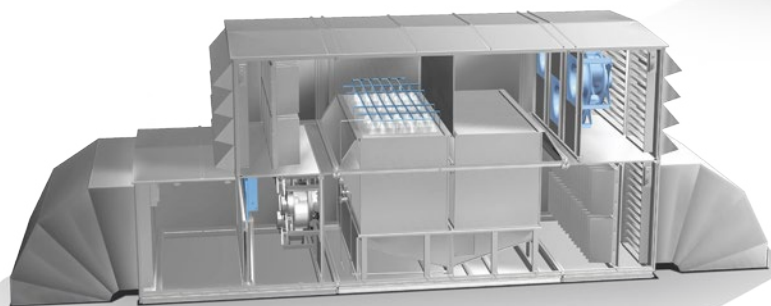

Our F version incorporates an extremely energy efficient free cooling feature to compliment all the benefits of our A-version design. We use electronically commutated (EC) fans both indoor and outdoor, an on-board EC free cooling pump and variable speed compressors should the DX system be needed.

F version is the flagship of our range, using indirect free cooling to achieve an extremely low annualised pPUE of only 1.1.

- Energy efficient free cooling
- EC fans both indoor & outdoor
- On-board EC free cooling pump
- Less space required
- Comparable running costs to evaporative cooling systems
- Lower capital cost

Ultra-DENCO®
Chilled Water Close Control Unit

Adia-DENCO®
Indirect Evaporative Cooling unit
