

ReCooler HP

ReCooler HP Integrates best components for coolings, heating and energy recovery in one solution

The ReCooler Heat Pump is a total solutions for consultants, contractors and end users. The combination of installation of an AHU + condensing system and controls in one place. With the added benefit of offering better energy savings all year round than a traditional system

This is a true plug and play solution offering zero coordination between different disciplines and all pre-tested at our centre of excellence in Jönköping.

**ONLY ONE UNIT,
ONE SUPPLIER,
ONE CONTRACTOR
AND NO WORRIES**
