

Fulton was established in 1966, specialising in ready-to ship, skid mounted and fully packaged boiler plant to meet demand for off site fabrication. Fulton puts great emphasis on providing sales and application advice with a full commissioning and after sales service to a growing customer base in hospital, healthcare facilities, food and beverage processing, laundries and other applications, including operator training, water treatment packages and boiler house risk assessments. The new, ultra-low NOx, high efficiency, MCPD-compliant VSRT has been added to Fulton's existing range of proven steam products.
