

Piping Solutions for Building Services

Here at GF we know a thing or two about piping systems; after all we've been supplying pipe fittings for over 150 years. Over the last 60 years, we have developed many plastic systems to become Europe's leading manufacturer of plastic pressure piping systems.

GF's lightweight and non-corroding plastic piping systems are becoming a must for building services projects. With a wide range of systems, including pre-fabrication and pre-insulated options, GF have the right system for your project.
