SPECTRUM RADIANT HEATING PANELS

SPECTRUM RADIANT Heating Panels combine:

- ✓ Excellent performance
- ✓ Low energy consumption
- ✓ Unobtrusive design
- ✓ Space saving solution
- ✓ Easy installation
- ✓ Realistic pricing

The Spectrum range of radiant panels provide a comfortable indoor climate for occupants as well as an energy efficient solution for a wide variety of industrial, commercial and institutional applications.

The **Spectrum Pro** is designed with full flexibility Tbar or Free Hanging with 15mm waterways and optional widths and lengths to suit all types of installation with high output compared with competitors.

The **Spectrum Plus** is designed for Tbar and plasterboard installations with higher outputs specifically with health and education projects in mind and 10mm copper meanders to ensure turbulent flow through the panel.

We are the leading supplier to many markets: classrooms and sports halls in schools, hospitals, residential care homes as well as offices and light industrial units.

Both ranges have the following features:

2mm high grade aluminium extrusion, lightweight, robust, optimum response time

RAL 9016 white powder coat

Outputs to EN 14037

Rigid non fibrous, foil faced insulation

Max operating temperature 90°C

Max test pressure 16 bar

Max operating pressure 10 bar.
