

## Energy efficiency meets design flexibility

### TROX Multi Service Chilled Beam Systems

TROX multi service chilled beams offer design flexibility and aesthetic innovation. Casing design and high grade architectural extrusion can be bespoke to meet client needs. Total flexibility to integrate mechanical services including lighting, controls, sensors, alarms and future partitioning sections can be incorporated within the design.

*DID 632*

- High quality aesthetics
- Architectural grade extrusions
- Design flexibility
- Full services integration with plug and play capability
