

## The complete CHP solution

With over 600 units in operation and 30 years experience Veolia can provide you with all your CHP needs. From pre-sales consultancy and advice, through installation, operation and comprehensive lifetime technical support Veolia will be with you at all stages of the life of your CHP.

Our CHP energy solutions deliver sustainable energy, with guaranteed savings, by generating them directly on your site, for your site. By being close to the energy users our systems put you in control of your energy needs and your energy costs now

and in the future. And all of our systems have lifetime support backed by our nationwide teams.

**Feasibility studies** - Helping you understand whether CHP is suitable and what benefits you can expect to achieve from it

**Concept design** - What will a CHP look like at your location and how will it integrate with your existing systems

**Comprehensive advice** - Our experience will help you to gain the maximum benefit

**Project funding** - You can benefit from the financial and carbon benefits of

CHP without the capital cost through the Veolia ECO2Synergy scheme

### **Project management**

- Veolia will provide a project manager to ensure that your CHP is installed correctly and meets relevant legislation

### **Operation and Maintenance**

- Our large service team, supported 365 days a year by the Veolia CHP control centre will minimise your downtime and ensure you receive the maximum benefit
