

## VITOCROSSAL 100

Easy to move and install, floorstanding gas condensing boiler designed especially for compact plant rooms

The Vitocrossal 100 is a compact gas-fired condensing boiler with one of the smallest footprints in the market. It is perfect for smaller plant rooms and applications, especially when replacing boilers in confined spaces.

It combines proven Viessmann technology with a brand-new stainless-steel heat exchanger, robust MatriX cylinder burner and Lambda Pro combustion controller.

Single unit 80 - 318 kW  
Twin boiler up to 636 kW

6 Bar pressure

Pre-wired & pre-assembled

NO<sub>x</sub> <24mg/kWh  
(2 Credit Points)\*

Lambda Pro Combustion control

Stainless steel heat exchanger

Width from 680 mm

Energy Technology List (ETL)
