

IMAGINE THIS IS YOUR ENERGY BILL

YOU MIGHT BE BETTER OFF WITH JUST HALF

Per kWh of energy, electricity is five times the price of gas! By using YANMAR Gas Heat Pumps to provide the temperature control of your facilities you can cut your energy bills by up to 50%. Using gas as the primary energy will reduce your electrical power requirements by 90%

giving you flexibility on your building design and operations. Another big plus of a YANMAR Gas Heat Pump is the ability to reclaim waste heat and use this to provide a source of free hot water. For further details, let's chat. Call Steve Walford on 07553 597 405.
