

# Air Humidity Management

The importance of maintaining ideal and specific levels of humidity in working environments is crucial to obtain optimum efficiency and productivity levels, even more so in certain controlled environments such as computer rooms, research laboratories, hospitals and industrial clean rooms.

CARR MARKETING LIMITED has over 25 years experience in specifying, installing and maintaining humidity management systems.

Typical installations include libraries, museums, office buildings, hospitals, laboratories and manufacturing plants in industries as diverse as pharmaceutical, electronics, photographic, tobacco, data processing and IT manufacturing.

Carr Marketing is the UK distributor for several leading manufacturers, supplying a diverse range of humidifiers & de-humidifiers using different primary heat sources.

This brochure illustrates the product range available from Carr Marketing and is designed to help the specifier select the correct humidity management system for any particular environment.
