

JS Air Curtains

HeatScreen Air Curtain

High performance, low cost.

Ideal
for retail

Easy to install – wall fixing plate & 2m pre-wired cable

Easy to operate – hand-held remote or integral panel

High performance – Fast-acting heating elements, <9kW heating & 1,670m³/h airflow

Low maintenance – Wipe clean only

Versatile use – heating or air only operation for winter/summer use

Energy efficient - 20% less energy use due to fast heat elements

The HeatScreen Air Curtain

Length dimensions

The JS HeatScreen is easy to install, only requires a single phase power supply and has an integral control system. This makes it ideally suited to small shop entrances, cafés, restaurants, hotels or other public entrances where an overdoor heater is not sufficient but a three-phase air curtain is too expensive.

Horizontally mounted

Can be mounted horizontally above doorways up to 2.1m high.

Features

- High performance
- Economic
- Three lengths
- Single phase power
- Remote control operation
- Fast acting heating elements
- Safety overheat protection
- 3 minute run-on to remove residual heat
- One year warranty

Remote Control
